

# Complex Variables and Elliptic Equations

An International Journal of Elliptic Equations and  
Complex Analysis

Special Issue: In honour of Professor A. Okay Çelebi on the occasion  
of his 70th Birthday

Guest Editors: Heinrich Begehr, Robert P. Gilbert and  
Massimo Lanza de Cristoforis

## Contents

---

Preface <i>Umit Aksoy</i>	451
A new process for constructing coefficients of elliptic complex equations in multiply connected domains <i>Guo Chun Wen</i>	459
Some relations among the classes of pseudo $Q$ -holomorphic functions <i>Mehmet Çağlıyan and Sezayi Hızıyel</i>	471
Modified harmonic Robin function <i>H. Begehr and T. Vaitekhovich</i>	483
On Hilbert-type boundary-value problem of poly-Hardy class on the unit disc <i>Yufeng Wang</i>	497
A singularly perturbed nonlinear Robin problem in a periodically perforated domain: a functional analytic approach <i>Massimo Lanza de Cristoforis and Paolo Musolino</i>	511
Oscillation of nonlinear elliptic inequalities with $p(x)$ -Laplacian <i>Y. Şahiner and A. Zafer</i>	537
Green functions and related boundary value problems on the Heisenberg group <i>Ajay Kumar and Mukund Madhav Mishra</i>	547
Initial value problems in Clifford-type analysis <i>Yanett M. Bolívar and Carmen J. Vanegas</i>	557
A refined Schwarz inequality on the boundary <i>T. Aliyev Azeroğlu and B.N. Örnek</i>	571
